

Zack & Zoe

THE BIG
SEARCH & FIND

FAMILY
GAME

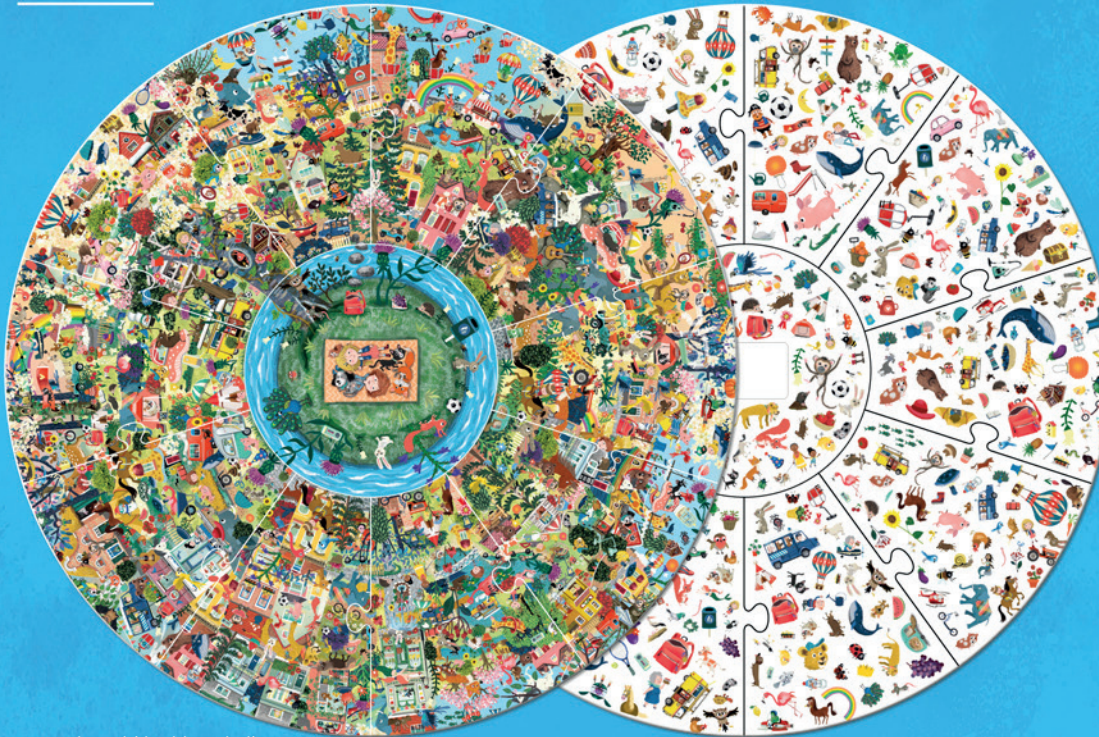

RULEBOOK

GOAL OF THE GAME

Discover the colourful world of Zack and Zoe by finding all items on the cards on the gameboard as fast as possible. There are five different categories. When you complete a category, you earn a token for your player board. Whoever is the first to complete all categories and has therefore collected all five tokens, wins the game!

CONTENTS

1 dice

1 hourglass (30 sec.)

20 pawns

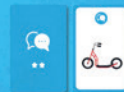

20 tokens

1 gameboard (double-sided)

4 player boards

275 playing cards (55 per category)

55 x Who,
what, where?

55 x Memory

55 x I
challenge you!

55 x Counting

55 x Who's
the fastest?

SETUP

Put the gameboard puzzle together and place it in the middle of the table. Each player chooses a player board and receives the matching pawns of the same colour (5 pawns per person). Place 1 token of each category next to all player boards, so 5 tokens in total. Shuffle all cards and create a pile for every category. Place the piles facedown on the table.

PLEASE NOTE! Items may also be found in the middle **1** of the gameboard. The only place where players are not allowed to look is the blanket on which Zack and Zoe are lying with their animal friends **2**. This is where the played card is placed during each turn.

THE GAME

To begin the game, all players look for the first item at the same time. Turn over the top card of the "Who's faster?" category. Whoever is first to find the depicted item begins. Return the card to the bottom of the pile. The active player rolls the dice, turns the top card of that category face up and completes the task. Then it is the next player's turn. Play in a clockwise manner.

PLEASE NOTE! If you roll a category that you already have, your turn goes to the next player.

THE DICE

The various sides of the dice refer to the following categories:

Who, what, where?

Memory

I challenge you!

Counting

Who's the fastest?

Category of your choice

CATEGORIES

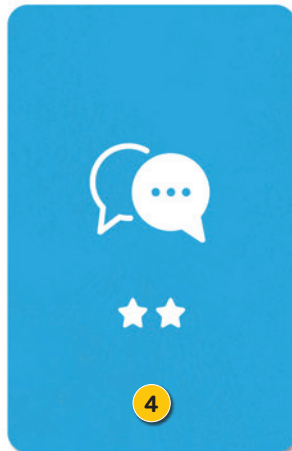

WHO, WHAT, WHERE?

Ask the right questions to find out which item **3** you must find. The player to your left draws a card from the "Who, what, where?" pile **4**. You do not get to see this card. Turn the hourglass and ask questions to find out which item is on the card. Question examples: is it edible? Is it an animal? Is it a person? Is it red?

If you have correctly guessed the item within 30 seconds and indicated the item on the gameboard with your pawn, the category has been completed. Have 30 seconds passed, and have you still not found the item or even guessed what it is? Then you get one last shot. Turn the hourglass once again and use these 30 seconds to find the item or take a gamble. No more questions are allowed. If you have placed your pawn on the correct item, you earn a token.

PLEASE NOTE! You can only ask questions that can be answered with a 'yes' or 'no'.

The item on the card must correspond exactly with the item on the gameboard.

MEMORY

Do you have a good memory? Draw a card from the "Memory" pile **6**. Take a good look at the three items **5** on the card, because you do not get to look at them anymore afterwards. Place the card facedown and turn the hourglass. Look for the items on the gameboard and place your pawns on them. Are you able to find all three items in time? Then you earn a token.

The item on the card must correspond exactly with the item on the gameboard.

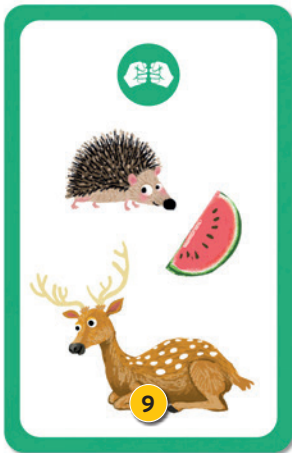

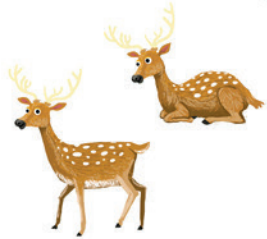

I CHALLENGE YOU!

Which player will you challenge to a duel? Draw a card from the "I challenge you!" pile **10** and choose a fellow player to go head to head with. The searching begins as soon as the card is lying faceup on the gameboard. Place your pawns on found items **9**. All items are repeated at least twice on the board. Are you the first to find all three items? Then you have won and can place the token on your player board. Your opponent cannot win a token but they can beat you, so that you do not earn a token.

PLEASE NOTE! You cannot place your token on an item that has already been found by your opponent.

The item on the card does not have to correspond exactly with the item on the gameboard. For example, the item can be in a different position.

COUNTING

You may have noticed that many items appear more than once in the world of Zack and Zoe. Draw a card from the "Counting" pile **12**, place it faceup on the board and turn the hourglass. Are you able to find five duplicates of the item **11** that is on the card? Place a pawn on each item to keep track. Have you found all of them in time? Then you earn a token.

The item on the card does not have to correspond exactly with the item on the gameboard. For example, the item can be in a different position.

WHO'S THE FASTEST?

This is your chance to challenge all of your opponents. Draw a card from the "Who's the fastest?" pile **8**. Everyone participates in this round and starts searching as soon as the card is placed faceup in the middle. Whoever is first to find the item **7** on the card has won and earns a token. This means that any player can earn a token, even if it is not their turn. Players who already have this token can thwart the other players by winning, because then nobody earns a token.

The item on the card must correspond exactly with the item on the gameboard.

CATEGORY OF YOUR CHOICE

This roll allows you to choose which category you would like to play.

DIFFERENT LEVELS

The cards have stars on the back that indicate the level of difficulty.

easy

medium

hard

For the first time, we recommend using the cards with 1 star.

The gameboard has 2 different sides. The side of the board without background illustrations **13** makes searching a little bit easier. Additionally, you can put the puzzle together in different ways on this side, so you can create a new search-and-find picture everytime. That means hours of playing fun!

END OF THE GAME

Are you the first to fill your player board with tokens of all categories? Then you have won!
